A simple, step-by-step guide to submitting your smile photos from home.

No appointment needed — just your smartphone and a few minutes.

How It Works — 4 Simple Steps

———— From your sofa to your personalised smile report in 4 easy steps. ————

No visit
required.

No
obligation.

Takes just
a few minutes.

azuredental

Thoroughly Plan, Treat, Surg & Wiser, Smile Honestly

Choose the method that works best for you.

★ Option 1 (Recommended)

Ask a friend to use
the back camera **with flash**.

The flash helps clearly illuminate your smile
for the best results.

OR

👤 Option 2

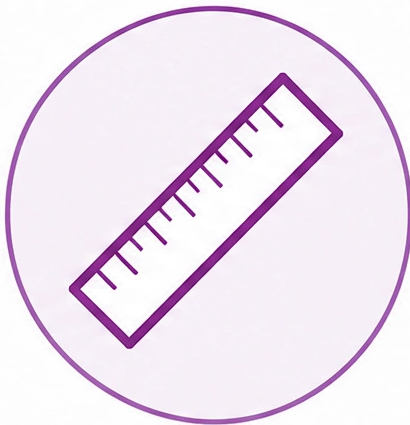

Take a selfie in a
very well-lit room **facing a window**.

Natural light from the window helps capture
a clear and bright smile.

Photography Tips for Clear Results

Three quick tips to ensure your photos are perfect.

1

Get close to the camera

Fill the frame with your smile.

2

Pull your cheeks back

Use your fingers to gently retract your cheeks so all your teeth are visible.

3

Good lighting matters

Make sure your teeth are well-illuminated with no shadows.

The 6 Photos We Need

Here are the 6 specific angles our team needs to assess your smile.

1

Front Smile

Smile naturally showing your teeth.

2

Front Bite

Bite down gently, pull lips back.

3

Upper Teeth

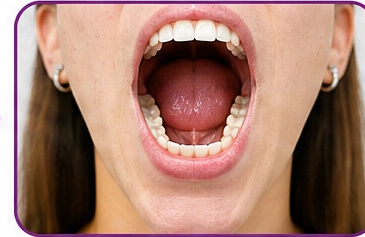

Tilt head back, open wide.

4

Lower Teeth

Tilt chin down, open wide.

5

Left Side Bite

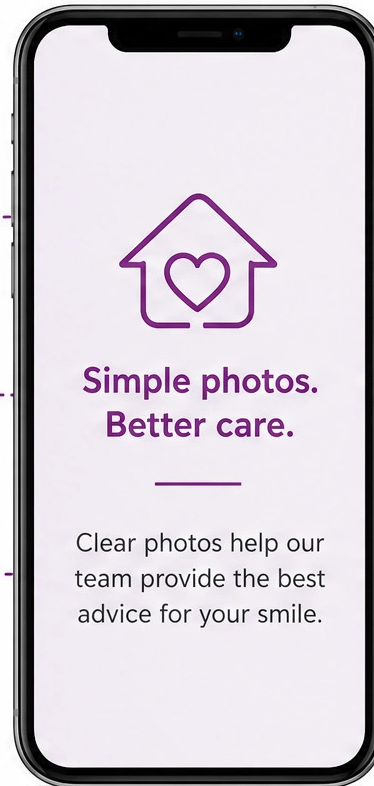

Bite down, pull left cheek back.

6

Right Side Bite

Bite down, pull right cheek back.

Good lighting, in focus, and centered smiles help us give you the most accurate assessment.

What Happens Next

Submit your photos and our team takes care of the rest.

1

The Azure Dental clinical team personally reviews your case.

2

You receive a call to discuss potential treatment options (Invisalign, bonding, veneers, whitening).

3

Schedule a clinical consultation if required. No obligation at any stage.
